

Quant in your pocket.

Validation-gated portfolio research, paper execution, and full audit trails in one system.

- V00 CORE
- H63 RANKER
- DSR/PBO GATE
- PAPER ONLY
- DB FILLS
- ALERTS
- PIT AUDIT

Configure risk

Choose a risk profile; the API maps it to a matching catalog bucket and a 1Day portfolio run.

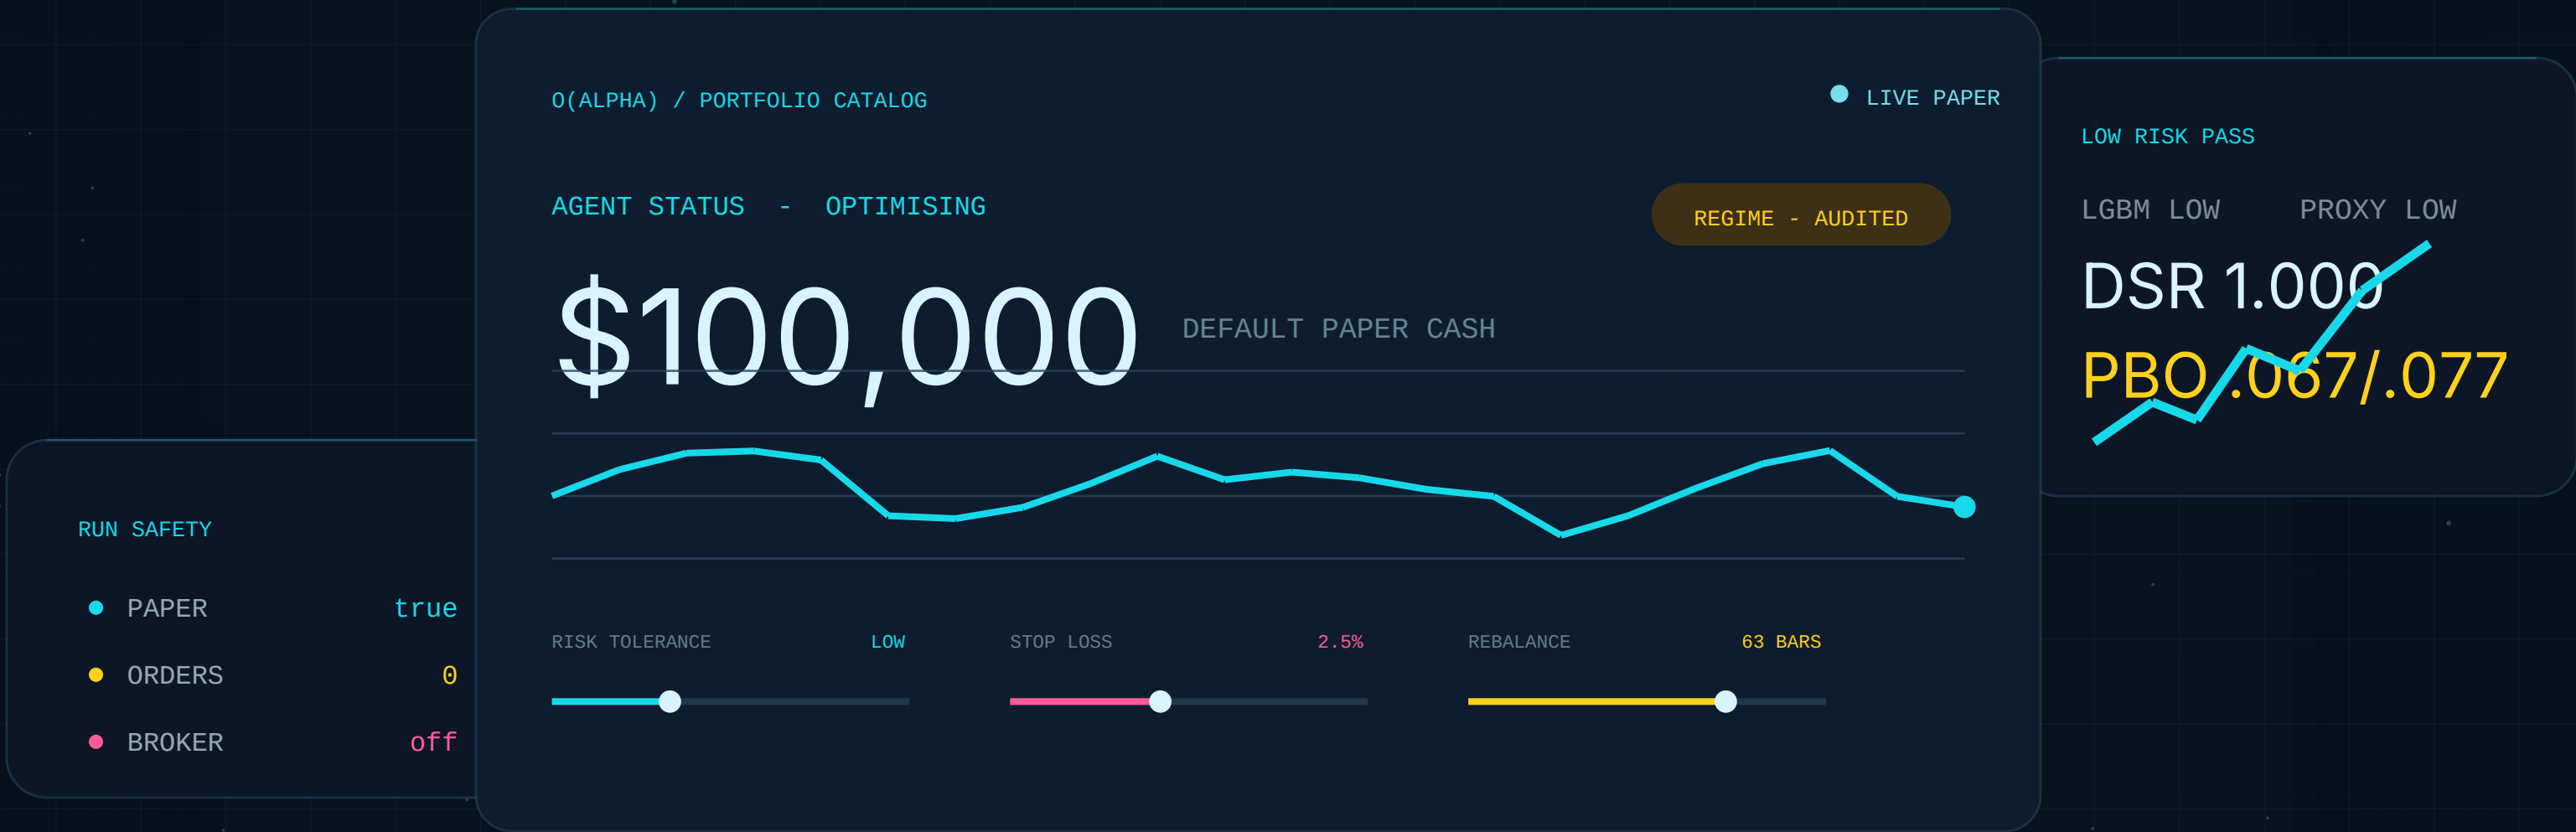

Select catalog alpha

Low-risk h63 LGBM and deterministic proxy entries pass both primary and shifted validation windows.

Track the paper trail

Fills, positions, snapshots, alerts, and active runs are persisted for the dashboard.

SYSTEM ARCHITECTURE - RESEARCH TO PAPER EXECUTION

POWERED BY

- Go
- Gin
- Next.js
- React
- TypeScript
- PostgreSQL
- TimescaleDB
- Redis
- Docker
- Vercel
- Alpaca
- Yahoo
